SPONSORING & EXHIBITION PACKAGES ICONAN 2027

THE CHALLENGES OF CHEMISTRY FOR TOMORROW

Marking its seventh edition, ICONAN 2027 will highlight the impressive progress achieved in nanomedicine while opening new perspectives on what lies ahead for the field. This edition will focus on advancing our understanding of nano-bio interactions across scales and examining how cutting-edge technologies—such as AI, bioelectronic systems, and organoid models—are reshaping therapeutic innovation, from gene and cell therapies to next-generation drug delivery platforms.

Building on this momentum, ICONAN 2027 will continue to serve as a dynamic forum for collaboration, encouraging researchers to exchange ideas, discover emerging technologies, and connect with colleagues from across the globe.

CITY & VENUE

Paris, the city of light, is one of the most, if not the most, famous capital of the world. Its cultural heritage through the ages is fascinating and includes many unrivalled monuments such as the Sacré-Coeur, Notre Dame de Paris (fully restored), and, obviously, the Eiffel Tower. It is also renowned worldwide for its numerous museums including the Louvre, Musée d'Orsay, Muséum national d'Histoire naturelle and so many others. Paris is a vibrant, lively city with many typical corners to discover, as well as Parisian bars, cafés and gourmet restaurants.

Sorbonne University, specifically its Pierre and Marie Curie campus, is one of the most prestigious and historic institutions in France. Located in the heart of Paris, this campus is renowned for its excellence in science and medicine. Born from the merger of Pierre and Marie Curie University (UPMC) and Paris-Sorbonne University in 2018, Sorbonne University embodies a tradition of academic innovation and cutting-edge research.
