

FOOD AUTHENTICITY TESTING BY NUCLEAR MAGNETIC RESONANCE (NMR TRAINING)

20th - 24th **2026**
APRIL

Food authenticity testing using Nuclear Magnetic Resonance (NMR) is a powerful technique to verify the composition and quality of food products. NMR spectroscopy can be applied to analyses the chemical composition of food items, including the identification and quantification of various components. Here is a general overview of how NMR can be used for food authenticity testing, along with some key considerations for sampling analysis:
