3. PROFESSIONAL COMPETENCIES

The professional competencies for the shortened CSci application route are grouped into two key areas:

- B. Personal responsibility**
- C. Interpersonal skills**

All sections must be completed.

B4	Oversee the implementation of solutions and demonstrate an understanding of potential and actual impacts of your work on your organisation, on the profession and on the wider community. <i>You should demonstrate an understanding of the potential and actual impacts of your work on your organisation, on the profession, on the general public and on the physical environment.</i>	
C1	Demonstrate the ability to communicate effectively with specialist and nonspecialist audiences. <i>A non-specialist audience is anyone working outside of your particular area of expertise, so it would not necessarily be a nonscientist. Your example(s) should indicate how you have communicated in a way that is effective to each type of audience.</i>	

C2

Demonstrate effective leadership through the ability to guide, influence, inspire and empathise with others.

This competence is about understanding your leadership skills and is not reserved for those in management roles, it is applicable to all.

C3

Demonstrate the ability to mediate, develop and maintain positive working relationships.

You should describe or define the "working relationship" and provide at least one example which focuses on your handling of a challenging interpersonal situation and demonstrates your ability to mediate and achieve a positive outcome. You should consider how through your approach you have changed or modified the behaviour or attitudes of others to positive effect.

4. CSci SUPPORTER'S REFERENCE

Please comment on how you feel the applicant has met the competencies for CSci. Please link your answers to the following two areas:

Personal responsibility
Interpersonal skills
