

WORLD CONGRESS on NANOMEDICINE 2026

27th-30th September

Vigyan Bhawan, New Delhi, India

www.wcn2026.in

- Organized by -
Institute of Nano Medical Sciences (INMS)
Faculty of Medical Sciences, University of Delhi
<https://www.inms.du.ac.in>

Nanomedicine 
where the **Future**
of **HEALTHCARE** Begins
at the **NANOSCALE**

Prof. Roger Kornberg
Nobel Laureate
Chairman, WCN - 2026

WORLD CONGRESS on NANOMEDICINE 2026

Co-hosts

ABOUT THE WORLD CONGRESS ON NANO MEDICINE 2026

World Congress on Nano Medicine 2026 (WCN - 2026) is being organized under the umbrella of International Society of Nano Medical Sciences (**ISNS**) & International Society For Nano Medicine (**ISNM**); and will be hosted by Institute of Nano Medical Sciences (**INMS**), Faculty of Medical Sciences, University of Delhi in collaboration with various academic institutes and government funding agencies like: ANRF, AYUSH, CSIR, Department of Health Research - ICMR, DRDO, DST, DBT, INSA, NAMS, NASI, IISERs, NIPERs, AIIMS, IITs, NITs, IIITs, Ministry of Health, NITI Aayog, Ministry of Education, Ministry of External Affairs, University Grants Commission, Ministry of Food Processing Industries, SUNY Buffalo, New York Academy of Sciences, Sechenov Medical University Moscow, and pharmaceutical industries, other national and international Universities and Institutions.

WCN - 2026 will bring together over 2000 participants including eminent scientists and young researchers to share knowledge, innovations, and advancements in Nano Medicine. We are inviting our esteemed invited speakers including Nobel Laureates and distinguished scientists from all over the world. **Prof. Roger D Kornberg**, Nobel Laureate, Stanford University, USA will be the Chairman of the World Congress 2026 and **Prof. TMS Chang**, FRS (Canada), McGill University will be the Honorary President of this world congress.

Hon'ble Droupadi Murmu, President of India has been requested to inaugurate this World Congress and INMS is organizing the World Congress under the leadership of **Prof. Yogesh Singh**, Hon'ble Vice Chancellor, University of Delhi. We have also requested the Science & technology for the Society forum (STS Forum) Japan, World Health Organization (WHO), American Chemical Society (ACS), and Royal Society of Chemistry (RSC) to actively support in this World Congress on Nano Medicine.

WCN - 2026 will allow students and faculty to interact with outstanding researchers and build a network with professionals and researchers. These connections can lead to collaborations and mentorship opportunities. Conferences provide access to the latest research trends, industry's best practices, and emerging trends. Faculty and students can learn from the successes and challenges of others through panel discussions and case study presentations. Conferences offer students the opportunity to improve their communication, presentation, and networking skills. Students can learn how to articulate their research findings effectively and engage with diverse audiences. Conferences provide a chance for students to face their fears and speak in front of a large audience.

ABOUT THE INSTITUTE OF NANO MEDICAL SCIENCES (INMS)

University of Delhi has taken a conscious decision by establishing "Institute of Nano Medical Sciences (INMS)" to achieve this objective and play pioneering role in the development of Nanomedicine and finally "in-body hospital" to solve global human health problems. Nanomedicine is a powerful tool that can be used to combat a variety of challenges, including chronic diseases, cancer, aging and neurological disorders. One of the cornerstones of our goal to promote health, keep the world safe, and assist the vulnerable to be a role model in dealing with future health concerns and collaborating with the international community to give support for these important systems.

Novel drug delivery methods and nanoscale screening

tools will also soon assist astronauts planning missions to Mars and beyond, while the space laboratory will foster advances in nanotechnologies for diagnostic and therapeutic tools to help our patients here on Earth.

In the future, we will have a mini hospital inside our bodies, complete with medical and diagnostic tools that operate as nanomachines. The concept of an "in-body hospital" is a moonshot, a vision that might spark a wave of Nanomedicine advancements. It is a dream that we hope to realize by 2047, when India will be celebrating its centennial, the University of Delhi will be celebrating its quasiquintennial anniversary (125th year of its establishment) and INMS will be celebrating its Silver Jubilee. INMS' goal is to use nanomachines to heal the body from within. The creation of nanomachines that are spread throughout the human body and perform detection, diagnosis, and treatment while communicating wirelessly with doctors who monitor and direct treatment.

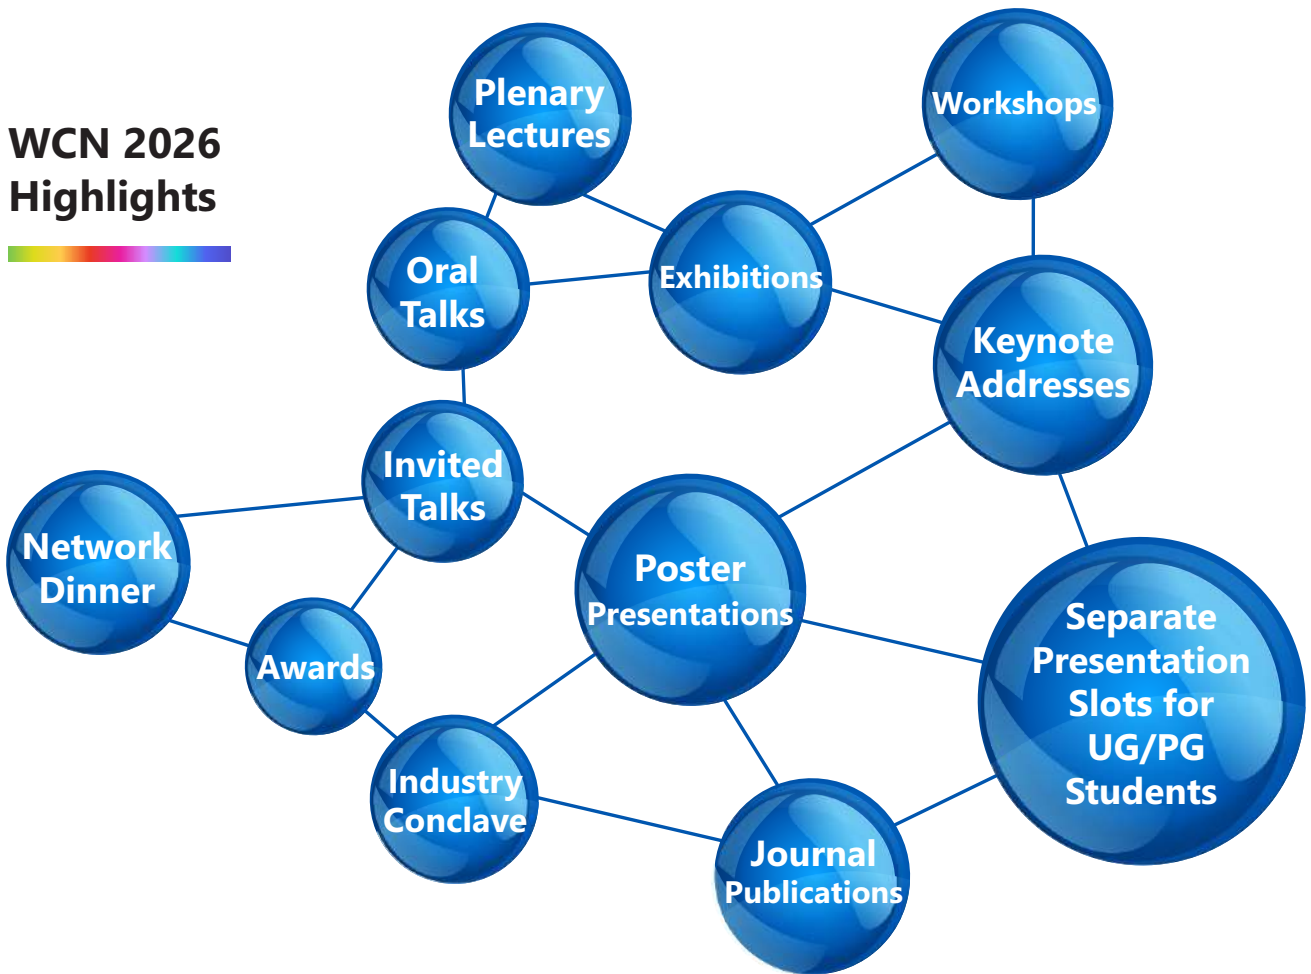

We have nanomachines made from organic compounds that circulate in the blood and accumulate at disease sites, such as cancer, and treat them, or a nanomachine that captures chemical information from a disease site and transports it to an implemented chip, where analysis is performed, and the information is transmitted to doctors outside the body. Nanocarrier – a Japanese business driving Nano-tech treatments for a variety of cancers, including those of the pancreas, lung, breast, stomach, head and neck – is developing polymer micelle nanocarriers for targeted medication and gene delivery. Nanomedicines can be magnetically or enzymatically propelled towards diseases sites within the body for site-specific treatment.

The fundamental goal of INMS' R&D effort is to create a hub of open innovation networks for smart health by bringing together medical researchers, engineers, and clinicians from Indian and International Universities, Government Institutes, companies, and chemical manufacturing industries. INMS research cooperation will be led and honored by the University of Delhi and will be co-located with other laboratories in the United States, Russia, and Europe.

INMS' core visions include human health, quality of life, and active sustainability, all of which are aimed at creating a future India in which nanotechnology, robotics, artificial intelligence, and data are used by government, industry, and civil society to create both economic development and solutions to existing social problems.

The concept of INMS was proposed during the 6th world Congress of Nanomedicine (ICNSCON 2019), held in Vigyan Bhawan, Delhi, in January 2020. In that Conference, more than 1200 delegates from about 20 countries came together to discuss the key challenges in healthcare and brainstormed regarding the use of Nanomedicine to herald the next generation of clinical medicine and tools to effectively combat today's healthcare challenges. This was followed up with Recent Advances in Nano Medical Sciences (RANMS 2022), another major conference organized in VP Chest Institute, University of Delhi, during June 2022. Nobel Laureate Professor Roger Kornberg from Stanford University, USA, served as the keynote speaker in that meeting. Eminent Indian scientists Padma Bhushan Professor G P Talwar, Padma Shree Professor S. E. Hasnain, and Padma Shree Professor Goverdhan Mehta actively participated in these conferences. On 27th November 2024, INMS has organized Conference in Nanomedicine, where renowned scientist Professor P. N. Prasad from the State University of New York, Buffalo, served as the keynote speaker. All these conferences have proved to be major successes, and have helped bring INMS, University of Delhi, as a forerunner in the area of Nano Medical research in the world.

WCN 2026 Highlights

Best Abstracts Award

10 Best Abstracts will be awarded free registration upon review by the committee

Best presentation awards with Cash prize

10 Best Oral presentation awards & 20 Best Poster presentation awards

Travel Grants

50 Travel Grants with 2nd class Rail fare

Important Due Dates

Abstract Submission

31st May 2026

Notification of Acceptance

30th June 2026

Early Bird Registration

31st July 2026

Regular Registration

31st August 2026

Thematic Areas

This conference shall bring together Nobel laureates, global leaders, eminent scientists, budding researchers and aspiring youngsters to discuss and brainstorm the latest aspects of nanomedicine developments and their applications in solving today's healthcare challenges. A major focus of this conference shall be academia-Industry collaboration mediated commercial development and bench-to-bedside translation of latest nanomedicine products aimed at affordable healthcare for people across all socio-economic backgrounds. Some of the key topics of the Conference shall be:

Structural & Membrane Biology

Synthetic Biology & Gene Therapy

Therapeutic Nanomedicine

Drug Delivery Systems

Nanodiagnostics

Nanopharmaceutics

Nuclear Nanomedicine

Nanobiophotonics

Nanomagnetism

Nano Instrumentation

Drug Discovery and Development

Nano Bioelectronics

Nano Vaccines & Nanoimmunology

Nanosensors and Nanobiosensors

Precision Nanomedicine

Regenerative Nanomedicine

Artificial Intelligence & Modeling

Nanotoxicology

Nano-omics

Nanoparticles in Food & Agriculture

Marine Nanobiotechnology

Translational Nanomedicine

IoT in Digital Healthcare

Chemical Synthesis & Process
Technology

WCN - 2026 Organizing Committee

Patrons

Dr. Yogesh Singh
Vice Chancellor
University of Delhi

Dr. Digambar Behera
President, National Academy
of Medical Sciences, New Delhi

Prof. Goverdhan Mehta, FRS
Distinguished Professor
University of Hyderabad

Chairman

Prof. Roger D Kornberg
Nobel Laureate
Stanford University, USA

Prof. TMS Chang, FRSC[C]
Hon. President, Intl. Society
of Nano Medical Science

Prof. Ramesh Chandra, FRSC, FAMS
Founder Director, Institute
of Nano Medical Sciences

President

Co-chairs

Prof. Seyed E. Hasnain, FNA
National Science Chair
Sharda University

Prof. Nikolay Nifantiev
Professor, Zelinsky Institute
of Organic Chemistry, Russia

Prof. Bhanu P. Jena
Professor
Wayne State University, USA

General Secretaries

Prof. Indrajit Roy
Director, Institute of
Nano Medical Sciences

Dr. Snigdha Singh
Deputy Director, Institute of
Nano Medical Sciences

Conveners

Prof. Akilesh K Verma, FNA
Senior Professor, Dept. of
Chemistry, University of Delhi

Prof. Shrikant Kukreti
Senior Professor, Dept. of
Chemistry, University of Delhi

Dr. Rakeshwar Bandichhor, FRSC
Chief Scientific Officer, Aarti
PharmaLabs Ltd., Mumbai

Co-Conveners

Prof. Nidhi Chauhan
Professor
UPES Dehradun

Prof. Jitender Madan
Professor
NIPER Hyderabad

Dr. Suveen Kumar
Assistant Professor
NIPER Ahmedabad

Organizing Secretaries

Dr. Shubham Sewariya
Scientist In-Charge, Institute
of Nano Medical Sciences

Dr. Aarushi Singh
Assistant Professor, Ramjas
College, University of Delhi

Dr. Ratneshwar K Ratnesh
Asst. Prof., Netaji Subhas
University of Technology

International Advisory Committee[#]

Prof. Paul Nurse, Nobel Laureate
Director, Francis Crick Institute, London, UK

Prof. Harold Varmus, Nobel Laureate
Lewis Thomas University Professor

President, Indian National Science
Academy, New Delhi, India

Prof. Vinod K Singh, FNA
President, National Academy of Sciences,
Uttar Pradesh, India

Prof. G. D. Yadav, FNA
President, Indian Chemical Society,
Kolkata, West Bengal, India

Prof. David Harel
President, The Israel Academy of Sciences
and Humanities, Jerusalem, Israel

Prof. Hiroshi Komiyama
Chairman, Science & Technology in
Society (STS) Forum Tokyo, Japan

Prof. Deresh Ramjugernath
Rector and Vice Chancellor
Stellenbosch University, South Africa

Prof. Michal Lošťák
Vice Rector for International Relations
Czech University of Life Sciences Prague,
Czech Republic

Prof. John Sarrao
Director, SLAC National Accelerator
Laboratory, Stanford Univ., California, USA

Prof. Michael Hoch
Rector, University of Bonn, Bonn, Germany

Prof. Sunil Maharaj
Vice Principal Research Innovation and
Postgraduate Education, University of
Pretoria Pretoria, South Africa

Prof. Hayashi Mikako
Executive Vice President (International
Affairs) University of Osaka, Osaka, Japan

Prof. Antoinette de Bont
Rector Magnificus, Tilburg University,
Tilburg, Netherlands

Prof. Ksenia Chmutina
Associate Pro Vice Chancellor (Impact and
Internationalisation), Loughborough
University Loughborough, United
Kingdom

Prof. Ksenia Chmutina

Associate Pro Vice Chancellor (Impact and Internationalisation), Loughborough Univ. Loughborough, United Kingdom

Dr. Takayumi Homma

Executive Vice President for Academic Affairs Waseda University, Tokyo, Japan

Dr. Brendan M. Walsh

Senior Associate Provost Global Strategy Yale University, Connecticut, USA

Prof. Isabel Capeloa Gil

Rector, Catholic Univ. of Portugal, Portugal

Prof. Myra Conway

Associate Provost Innovation and Research, Univ. of Derby, United Kingdom

Prof. Toomas Asser

Rector, University of Tartu, Tartu, Estonia

Ms. Susanne Carls

Head of Unit - European and International research & Science, talent and social safety of scientists, Ministry of Education, Culture and Science, The Hague, Netherlands

Prof. Natalies Konomi

Vice President for International Affairs and Diversity, Kyushu University, Japan

Prof. Robbert Dijkgraaf, FRS

President, International Science Council, Former Minister of Education, Netherlands

Prof. Fatma Al Jasmi

Dean, College of Medicine and Health Sciences, United Arab Emirates Univ., UAE

Prof. Edward Anderson

Head of Organic Chemistry University of Oxford, United Kingdom

Prof. Derrick J. Clive

Professor, University of Alberta, Canada

Prof. Peter Rijnbeek

Professor & Head of Department of Medical Informatics, Erasmus MC Univ. Medical Center Rotterdam, Netherlands

Prof. Bhanu P. Jena

George E. Palade University Professor & Distinguished Professor, Wayne State Univ. School of Medicine, Detroit, USA

Prof. Michal Tomza

Professor, University of Warsaw, Poland

Prof. Paras N Prasad

Sponsorship Opportunities

Institute of Nano Medical Sciences (INMS) invites a wide spectrum of sponsorship opportunities for corporates from banks, industries and allied institutions. World Congress on Nanomedicine 2026 is a global platform for sponsors to gain incredible visibility and networking opportunities. Join global leaders in exploring the transformative role of science in achieving net-zero goals and sustainability through innovative partnerships and strategic industry collaborations.

Sponsorship Opportunity	Sponsorship Amount	Benefits				
		Advertising in Souvenir	Stall Size allotted	Free Delegate Pass	Conference Backdrop	Presentation
Diamond sponsorship	Rs. 15,00,000 OR Conference Dinner sponsorship	Outside back cover page (colour)	6 feet X 12 feet	06	Yes	Oral – 02
Platinum sponsorship	Rs. 10,00,000	Inside front/ Inside back (colour)	6 feet X 6 feet	03	Yes	Oral – 01
Gold sponsorship	Rs. 5,00,000	Inside full page (colour)	6 feet X 3 feet	01	Yes	Poster – 02
Silver sponsorship	Rs. 2,00,000 OR Conference session sponsorship	Inside half page (B & W)	-	-	No	Poster – 01

Sponsorship amount are exclusive of 18% GST.

Get in touch with us to customize a sponsorship package that aligns perfectly with your branding goals.

The University of Delhi

The University of Delhi is a premier academic institution of eminence which celebrated its centenary year in 2022. As a collegiate university, its main functions are divided between the academic departments of the university and constituent colleges. The university has 16 faculties and 86 departments distributed across its North and South campuses. It has 91 constituent colleges. The undergraduate, postgraduate, doctoral programmes are the instruments of permeation of higher education among the youth, and helped the university attract students from every nook and corner of the country. The numbers have grown to more than 7 lakhs, representing the microcosm of our nation as well as from across the globe.

Widely acknowledged for its innovative and leadership role in the field of higher education, the University of Delhi has produced eminent scientists, top ranking administrators, captains of business and industry and men and women who have enriched the social, cultural and political life of the country. Among the alumni there are illustrious personalities who have gone abroad and made their mark in all walks of life.

Over the last several years the University has become increasingly committed to its participation on projects and academic exchange programmes with global focus. It has entered into overseas agreements with several well-known universities in the USA, U.K., Australia, Europe, Russia, Canada, Japan, China, Ethiopia, Nigeria, Thailand, South Africa and other countries.
