

Speaker Profile

***Eleonora Mancinelli** is a **Senior Sector Group Manager** at **Cefic**, the **European Chemical Industry Council**, based in Brussels, where she has worked since 2013 in roles of increasing responsibility. She manages several industry associations, including the **European Polymer Dispersion and Latex Association (EPDLA)**, where she has been supporting the sector since 2021, contributing to its technical, regulatory, and organisational activities.*

She works closely with industry leadership and member companies to coordinate collective work, structure discussions, and ensure continuity across regulatory files. Operating at the interface of science, industry, and EU policy, she supports companies in navigating complex regulatory frameworks and evolving sustainability expectations.

Her work focuses on helping industry translate developments in areas such as REACH and chemical product regulation, and supporting science-based approaches to lifecycle, sustainability and regulatory challenges.

In particular, she leads engagement on topics such as microplastics and secondary microplastics, polymer-related regulation, biocides, and food contact materials, reflecting the wide range of applications of polymer dispersions in coatings, adhesives, construction, and paper.

Eleonora facilitates collaboration across the polymer value chain and contributes to constructive dialogue with European institutions, connecting technical expertise with strategic advocacy in a rapidly evolving policy landscape.

She holds a bachelor's degree in economics and law from the University of Bologna and a European Master's degree in Consumer Affairs, specialised in food safety, from the University of Montpellier.

Sustainable Polymers in Liquid Formulation Summit 2026

22 October 2026 | London, UK

Summit session:

UK and EU Circular Economy Landscape
